

$V_1 = 8.8$

Vol. of NaOH added (mL) →

$$N_1 = \frac{8.8 \times 0.1}{10} = 0.088N$$

$V_2 = 9.2$

Vol. of NaOH →

$$N_1 = \frac{9.2 \times 0.1}{10} = 0.092N$$
